Back	from \$360.00
Upper Back	from \$260.00

IPL (Intense Pulse Light) is a long term alternative to waxing and shaving. IPL permanent hair reduction offers the next generation of safe and effective treatment of unwanted hair. It works by the absorption of light energy by both the follicle and shaft of the hair. The follicle absorbs the energy of the light, heats up for a fraction of a second and are thereby destroyed. Most clients have 6-8 sessions ideally 4-6 weeks apart for the best results, depending on the individuals hair pigment and growth. Top up treatments may be needed to maintain results, as new hair follicles can be activated and grow.

You must avoid sun exposure on the area at least 6 weeks pre and post treatment, this also includes sun beds. Spray on and instant tan products must not be present on the treatment area. It is vital to use sun protection on areas exposed to the sunlight during treatment plan.

A consultation and test patch in the area to be treated is required before treatment takes place.

Consult fee is \$30 and is redeemable on first IPL treatment.
